

Environmental Policy

Red Engineering Design Ltd – an international consultancy in the design of infrastructure, new buildings and upgrade engineering for the technology and commercial sector is committed to leading the industry in minimising the impact of its activities on the environment and achieving best practice through a programme of continual improvement.

We recognise that care of the environment is an integral component of the chain process for mechanical, electrical and public health services for buildings, we are therefore committed to operating an Environmental Management System that has gained BS EN ISO 14001:2015 certification.

The key points of its strategy are:

- Minimise waste by evaluating operations and ensuring they are as efficient as possible
- Actively promote recycling both internally and amongst its customers and suppliers.
- Source and promote a product range to minimise the environmental impact of both production and distribution.
- Use an accredited program to offset the greenhouse gas emissions generated by our activities
- Achieve best practice, in particular to reduce energy consumption of and emissions from buildings.
- Follow all industry standards and Codes of Practice relating to the design of mechanical, electrical and public health services
- Endeavour to design energy and operational efficiency into new services and buildings
- Assess the environmental impact of all materials and substances used during their construction and installation of services.
- Reduce as much as possible, levels of harmful emissions that could occur during construction and operation of services.
- Seek to reduce consumption of materials in all our operations, re-use rather than dispose, promote recycling and the use of recycled materials.
- Encourage the use of suppliers who are committed to sustainable environmental improvement.
- Comply with and where possible exceed the requirements of all relevant environmental legislation.
- Ensure that the Management Reviews set and review the Environmental Objectives, and reports on the Internal Audit results as a means of monitoring and measuring the processes and the effectiveness of the Environmental Management System.
- Continually improve the effectiveness of the Environmental Management System.

RED communicates its policy and commitments to all employees with the support and leadership of its Management.

This Environmental Policy is regularly reviewed in order to ensure its continuing suitability.

Copies of the Environmental Policy are made available to relevant interested parties. Copies of the minutes of Management Reviews, or extracts thereof, are provided to individual members of staff in accordance with their role and responsibilities as a means of communicating the effectiveness of the Environmental Management System.
